EDUCATION

Mechanical Engineering , Bachelor of Engineering　　　　2018-2021

KLE Institute of Technology Hubli

EXPERIENCE

Saranyu Technologies - Banglore　　　　2022(Nov)-Present

ROR Backend Developer

Worked on building multiple OTT platform projects such as Shemaroo, Etv-Win, Etv-Bharat, Otv-Tarangplus, CMS (In-house), and Enveu (Analytics).

- Developed and managed core features : User flow, Coupon code workflow, Subscription workflow, Payment gateway integration, ensuring seamless functionality integrations.
- Integrated the platform with third-party analytics tool using APIs for advanced user behavior tracking.
- Contributed to frontend enhancements using Ruby on Rails.
- Automated article ingestion from reporters and third-party ingester sources into our platform.
- Integrated B2B OTT platforms (e.g.. Ottplay, Bheemtv, Dorplay, Pioneer) with Etv-Win with SSO login.
- Performed key server operations such as server setup, crontab scheduling, Sidekiq, data dump/restore, and Barman backups and others.

CAREER HIGHLIGHTS

- Proficient in writing clean, efficient, and maintainable code.
- Experienced in handling large-scale databases (**10M**+records) across multiple tables and models.
- Skilled in API development, testing including implementing authentication, API keys, and secure token-based access.
- Ability to resolve complex bugs and optimize DB queries for better application performance and reliability.
- Strong communication and problem-solving skills with a client-centric approach.
